

Please keep the Internet free. Do not give in to corporations who will take complete advantage of how the Internet is run by pure profit motives. The Internet is for all the people not just the wealthy people who can buy the fastest cars and speed in their lanes specifically built for them. A free and open Internet gives all the people equal rights, which would promote ideas from everyone and protect the 1st amendment rights. As a country by the People and for the People do the right thing.

Yours Truly,
Lawrence P Kahsen
